

Class Activity 9/11

Team Roommate finder

Functional:

- Roommate tags that describe the user
- Require User Registration/login to access
- Show users with the same or similar tags to users
- Specified tags in search show up in results
- Users should have a private/ non-private messaging feature
- Should be able to filter by multiple categories such as gender, hobbies, and age.

Non-Functional:

- User can search across multiple dorms while browsing roommates
- Users should be able to easily navigate through our search system
- Users should have an easily accessible layout
- Users should have security with their messages and account information
- Registration for users should be easy and simple with some form of second authentication other than username/password.
